

Ladies Ring Stand
HOW Woodturning Demonstration
July 17, 2024
Demonstrator: Bruce Eckman

Presenter's Background

As a former machinist, Bruce is well acquainted with the lathe and turning concepts. It was that experience, that in 2001, led him to attend a basic woodturning class "Turning a Bowl". The class was presented at the Woodcraft store in Dayton, Ohio. There he found a new hobby and turned his first bowl. Previous to moving to Florida and joining Hands on Woodturners, Bruce was a 10-year member of the Ohio Valley Woodturning Guild.

Objectives

The objectives of his demonstration (demo) are to:

1. Select a project that can be demonstrated within a 70-minute time period;
2. Make it an interesting project that a woodturner may wish to complete;
3. Provide a brief overview of the primary tools used during the demo;
4. Provide attendees with an educational and enjoyable experience.

Project

Keeping the above objectives in mind, Bruce has chosen to demonstrate how he turns a "Ladies Ring Stand". These are made in two sizes and the smaller version will be used in this demo.
